### About Mission Creek Log Homes

Located in northwest Montana, Mission Creek Log Homes designs and builds custom handcrafted log homes.

Mission Creek Log Homes are built with full scribe, Swedish cope, or chink style construction. We use dry, dead standing lodgepole pine logs. The logs are hand-peeled with a drawknife to retain the protective insulating layer just under the bark. This technique helps preserve the natural color and character of each log.

What makes a Amish built log home is the extra care to complete details, the passion for quality workmanship, and the desire for customer service to complete a modern log home to meet your needs.

Our homes are first constructed in our yard and then numbered, disassembled and trucked to your homesite for reassembly. Our crew is available for assistance or full assembly of your home, depending on your location.

Mission Creek Log Homes would be pleased to give you a quote on your dream log home. Our homes are priced at approx. \$20 to \$30 per sq. ft. depending on the complexity of your log work design. Mission Log Homes offers pricing that includes shipping with no hidden costs.

Feel free to give us a call if you have any questions.

Sincerely,

JR Troyer  
Owner & Builder
